

Disclaimer

Dental implants from Dental Ratio International GmbH® as well as other Dental Ratio Systems® products are part of an overall concept and may only be used with the corresponding original components and instruments according to the instructions and recommendations of Dental Ratio International GmbH. Using products from third party manufacturers, which are not sold by Dental Ratio International GmbH, in connection with the systems of Dental Ratio International GmbH excludes any warranty or liability, whether explicit or implied, of Dental Ratio International GmbH. The application and technical advice concerning our products is given orally, in writing, by means of electronic media or by practical training and takes place using state-of-the-art science and technology at the time the product is launched. The user of products from Dental Ratio International GmbH has the obligation to personally decide whether a product is suitable for the respective patient and the given circumstances. Dental Ratio International GmbH declines any explicit or implied liability, responsibility and claims for damages for any direct, indirect or other damages, which have arisen in connection with any errors in the professional assessment or practical application in the use or insertion of products of Dental Ratio International GmbH. The user is also obliged to keep up to date on the current status of Dental Ratio International GmbH products and their application on a regular basis.

Attention

The descriptions contained in this document do not suffice for the immediate application of Dental Ratio International GmbH products. Dental know-how concerning implantology as well as proper instruction in handling the implant systems from Dental Ratio International GmbH by an experienced operator are essential in any case.

Availability

Not all parts are available in all countries.

Validity

With the publication of this brochure all earlier versions are invalid.

Caution

In addition to the safety instructions in this basic information, our products have to be secured against aspiration when used intraorally. Do not use damaged or blunt instruments.
